Work Experience

Software Engineer

Chennai, India

Barclays Global Service Centre Private Limited

July 2024 – Present

- Re-architected a high-throughput **SubLimit engine**, achieving **21× performance improvement** and **94% latency reduction** in production, significantly improving system scalability under peak load.
- Integrated optimized services with **Autosys** batch workflows, reducing job execution time by **80%** and enabling **5× faster batch processing**.
- Migrated legacy invoicing service from **Spring** to **Spring Boot**, integrating **Spring Security** and improving startup performance while simplifying deployment architecture.
- Resolved race conditions in concurrent **Drools (KieSession)** execution for Advance Rate calculations, ensuring **100% data consistency** and improving reliability of rule-based processing.
- Automated API validation using **Karate** and **GitLab CI/CD**, reducing manual validation effort by **80%** and accelerating release cycles.
- Designed and developed scalable **REST APIs** for a **Loan Inventory Management System**, enabling end-to-end workflows across **marking, advance rate, tie-out, funding, and loan sale**.
- Built an **Angular dashboard** to track code coverage across services, improving visibility and reducing manual monitoring effort across teams.

Software Developer (Intern)

Chennai, India

Barclays Global Service Centre Private Limited

June 2023 – Aug 2023

- Designed and implemented a data interpretation and visualization dashboard using **Angular, Spring Boot, and MongoDB**, enabling faster insights into operational data.

Projects

LegalEase - Multilingual Legal Assistant Chatbot

- Built an **AI-powered multilingual chatbot** for legal case insights, law retrieval, and speech interaction using NLP and text similarity. **Tech Stack:** Python, JavaScript, React

InterviewAce - AI Voice-Based Interview Assistant

Mar 2023 - Jun 2023

- Developed a **multimodal AI interview assistant** using NLP and sentiment analysis to evaluate user responses across text and speech. **Tech Stack:** Python, JavaScript, Flask

Skills

Backend & APIs: Spring Boot, REST APIs, Microservices

Security: Spring Security, OAuth2, JWT

Languages: Java, SQL, Python, JavaScript

Frontend: Angular, React

DevOps & Systems: Kubernetes, Docker, GitLab CI/CD, Autosys, Linux, Distributed Systems

Concepts: System Design, Performance Optimization, Multithreading and Concurrency, SDLC, Agile (Scrum)

Education

Madras Institute of Technology, Chrompet, Chennai

Aug 2020 – Jun 2024

BE Computer Science

- Graduated with First Class with Distinction — GPA: 8.97

Achievements

- Recognized for building **end-to-end Karate automation**, reducing manual testing effort and improving release efficiency.
- Recognized for developing an **Angular dashboard** providing real-time operational and funding insights to stakeholders.
